Responsibility

The mark of
responsible forestry

Social benefit and environmental sustainability are integral to our processes and our business, and Greatview is committed to benefitting the lives that we touch.

For consumers and customers we both increase the affordability of essential foodstuffs, while setting benchmarks in environmental responsibility. 100% of production from our German factory uses paperboard certified by FSC™ as being sourced from responsible sources.

We are also regularly audit certified according to the SMETA* (Sedex Members Ethical Trade Audit) which supports the ethical sustainability of our work and our supply chains.

For employees, we are a leader in employment practices wherever we operate, employing and operating without regard to race, colour, religion, gender, national origin, citizenship, sexual orientation, age, disability, or marital status. We are committed to training, supporting and rewarding our own employees and whenever possible to developing and using local suppliers.

Our plants are constructed to minimise energy and resource use. Examples of this include reusing process heat, recycling of process material, natural lighting, rainwater collection and carbon accounting in construction.

Greatview contributes directly in the communities where we operate. We support local charities, offer internships for local schools and universities, foster trade apprenticeships and participate in regional community activities such as tree planting.
